Jira → Samenwerken in team

LANGUAGES

Dutch : mother tongue
English : C1

About Me

Final-year Application Development student with strong skills in web, mobile, and backend development. Skilled in building full-stack applications across multiple programming languages and frameworks. Completed freelance work developing an Arduino Opta solution to control robotic pistons, showcasing problem-solving and hardware-software integration. Seeking an entry-level developer role to apply technical expertise and grow in a professional environment.
