TECHNICAL SKILLS

Programming Skills :

C#, C++, Java, Python, JavaScript, TypeScript, PHP, SQL, Dart, Bash

Frameworks & Technologies :

.NET / Entity Framework, Angular, React, Laravel / TALL Stack, Flutter, Arduino Cloud

Development Tools:

Visual Studio, Visual Studio Code, JetBrains IDEs, Git, GitHub, Docker

SOFT SKILLS

- Problem-solving
- Independent working
- Teamwork and collaboration
- Analytical thinking
- Adaptability
- Willingness to learn

LANGUAGES

Dutch : mother tongue
English : C1

About Me

Bachelor of Application Development graduate, currently pursuing a second bachelor's degree in Cloud and Cyber Security. Strong foundation in web, mobile, and backend development, with experience building full-stack applications using various programming languages and frameworks. Passionate about software development, cloud technologies, and cybersecurity, with a focus on continuous learning and practical problem-solving. Seeking an opportunity to apply technical skills and further develop professionally.

EDUCATION

Bachelor Cloud & Cybersecurity (Currently pursuing)

- Thomas More University of Applied Sciences, Geel, Belgium
2026 - Present

Bachelor Application Development (Completed)

- Thomas More University of Applied Sciences, Geel, Belgium
2023 - 2026

Elektronica - ICT (Completed)

- Sint-jozef , Geel, Belgium
Completed: 2023

WORK EXPERIENCE

Internship - Application development

- Ziekenhuis Geel - Geel, Belgium
February 2026 - May 2026

- Developed PoetsControle, an application for configuring and managing cleaning inspections, replacing a paper-based workflow.
- Designed and implemented database functionality and a web application for recording and monitoring inspection results.
- Worked with C#, SQL Server, and web technologies to develop practical solutions for internal hospital processes.
- Contributed to additional IT projects involving network device management, monitoring, and internal support tools.

Student developer

- Didak Injections - Grobbendonk, Belgium
July 2026

- Developed AlarmCentrale,a cross-platform alarm management system featuring an Android and iOS mobile application for viewing alarms and assigning them to yourself for follow-up.
- Built an administrative web application for managing users and overseeing the alarm system.
- Designed the solution to support efficient alarm monitoring and task ownership across mobile and web platforms.

- Creative Cooling - Herentals, Belgium
September 2025 - November 2025

- Developed Arduino software for a freezer simulation system and integrated it with a cloud-based dashboard for real-time monitoring and visualization of system data.
